Professional Summary

Software Engineer with over 5 years of experience developing solutions across education, finance, retail, and e-commerce sectors. My specialty and passion lies in **Frontend development with React.js and React Native**, building scalable, high-performance, and accessible interfaces. I complement my profile with a solid Full-Stack foundation in **C# (.NET)**, Java, and **Microservices**, as well as enterprise application development and maintenance. My experience combines banking application modernization, internal user support, and AI integration, with a focus on controlled and responsible adoption. Comfortable working with AWS Cloud environments and **Docker** deployments.

Technical Skills

- **Specialized Frontend:** React.js, React Native, Next.js, TypeScript, Tailwind CSS, Storybook, HTML5, CSS3, Angular (Complementary).
- **Primary Backend:** C# (.NET Core / .NET 9), Java, Spring Boot, GeneXus, REST APIs, Microservices, Node.js (Complementary).
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, CloudFront), Docker, Vercel.
- **Databases & Platforms:** SQL Server, IBM AS/400, PostgreSQL, SQLite, Redis; SQL queries.
- **Tools & Methodologies:** Git, GitHub Copilot, MCP (Model Context Protocol), Golang (CLI Tools), Agile/Scrum, A/B Testing (VWO).

Professional Experience

- **Digital Channels Analyst** Jun 2026 – Present
Banco GNB Perú
 - Develop and maintain banking applications using **GeneXus, Java, and .NET**, working across technologies according to each system's requirements.
 - Handle requests from internal bank users who rely on these applications to serve end customers, translating their needs into software updates and improvements.
 - Use SQL extensively across **IBM AS/400 and SQL Server** environments to query and work with data during application development and maintenance.
 - Participate in the controlled, responsible adoption of AI to support the team's work.
- **Software Engineer** Oct 2025 – May 2026
Softtek / RIMAC / Lima, Peru
 - Led the implementation of the corporate design system with **Next.js, TypeScript, and Storybook**, improving frontend development velocity by over **50%**.
 - Developed an **MCP (Model Context Protocol)** server in Go to integrate the design system with **GitHub Copilot**, enabling autonomous component querying and creation. Winner of the **Frontend Exchange 2025 – RIMAC Award**.
 - Built key screens for the Insurance History module and coordinated integration with backend teams.
- **Software Engineering Instructor** Feb 2023 – Jun 2025
CodiGo / Tecsup / Arequipa, Peru
 - Taught React, Next.js, and JavaScript to over 200 students in a bootcamp format.
 - Updated the curriculum and guided capstone projects integrating frontend and backend with **Docker** and AWS.

- Software Engineer** Sep 2023 – Apr 2024
 • *Zoluxiones / Scotiabank / Arequipa, Peru*
 - Led the migration to a modern **React and microfrontend architecture** in a banking environment.
 - Improved internal efficiency by **70%** through interface optimization and backend communication using BFF (Backend for Frontend).
 - Developed C# backend services and configured environments with **Docker** and AWS services (EC2 and S3).
- Software Engineer** Dec 2021 – Feb 2023
 • *Globant / Belcorp / Arequipa, Peru*
 - Developed features that improved project allocation by **15%**.
 - Implemented over 100 A/B experiments in VWO, achieving a **30%** increase in conversions.
 - Collaborated with the data analysis team to identify and implement website performance improvements.
- Software Engineer** Dec 2020 – Dec 2021
 • *Auna / Lima, Peru*
 - Contributed to the migration to React and Next.js, improving site load speed by **15%**.
 - Implemented data analysis tools in Farmauna, contributing to a **5%** increase in daily revenue.
 - Developed FastAPI backend services and managed deployments with **Docker** and **AWS EC2/S3**.
- Software Engineer** May 2022 – Sep 2022 / Oct 2019 – Mar 2020
 • *Inka Labs / Arequipa, Peru*
 - Contributed to a financial asset management application using **React Native and Angular**, improving user experience by **25%**.
 - Implemented real-time notifications and REST APIs using FastAPI and SQLite.

Education

- **TECSUP** | Software Design and Development 2025 – 2028
- **TECSUP** | Full Stack Web Development 2019

Certifications

- **Meta React Native Specialization** - Coursera Jul 2023
- **Meta Front-End Developer Specialization** - Coursera May 2023
- **Full Stack Web Development** - CodiGo

Selected Projects

- **Sports Betting API (.NET 9):** REST API with Entity Framework Core and **PostgreSQL**; deployed on AWS EC2 using **Docker** and Cloudflare.
- **Sports Betting BFF (FastAPI):** Data aggregation, caching, and security for frontend applications; deployed on **AWS Lambda**.
- **CSV Ingestion and Validation (Java / Spring Boot):** Microservice using hexagonal architecture for large-scale file processing with **PostgreSQL** and **Docker**.

Languages

- **English:** Professional Working Proficiency (Reading, Writing, and Technical Conversation).
- **Spanish:** Native.
