PROFILE

Software Engineer with over 5 years of experience developing solutions for education, finance, retail, and e-commerce. My specialty and passion is frontend development with React.js and React Native, building scalable, high-performance, accessible interfaces. I complement this expertise with a solid full-stack foundation in C# (.NET), Java, and microservices, as well as enterprise application development and maintenance. My experience combines banking application modernization, support for internal users, and AI integration with a controlled, responsible adoption approach. I am comfortable working in AWS environments and deploying applications with Docker.

WORK EXPERIENCE

Jun 2026 – Present

Digital Channels Analyst, Banco GNB Peru

- Develop and maintain more than 3 banking applications with GeneXus, Java, and .NET, and support responsible AI adoption.
- Support approximately 100 internal users and regularly manage around 50 enhancement requests.
- Query and manage data in IBM AS/400 and SQL Server to maintain and update banking applications.

Oct 2025 – May 2026

Software Engineer, Softtek / RIMAC · Lima, Peru

- Led the corporate design system with Next.js, TypeScript, and Storybook, accelerating frontend development by over 50%.
- Implemented an MCP server in Go to connect the design system with GitHub Copilot; the project won RIMAC's Frontend Exchange 2025 award.
- Developed key screens for the Insurance History module and coordinated integration with backend teams.

Feb 2023 – Jun 2025

Software Engineering Instructor, CodiGo / Tecsup · Arequipa, Peru

- Taught React, Next.js, and JavaScript to more than 200 students in development bootcamps.
- Updated the curriculum and mentored end-to-end projects using frontend, backend, Docker, and AWS.

Sep 2023 – Apr 2024

Software Engineer, Zoluxiones / Scotiabank · Arequipa, Peru

- Led migration to a modern architecture with React and microfrontends in a banking environment.
- Improved internal efficiency by 70% by optimizing interfaces and backend communication using BFF (Backend for Frontend).
- Developed backend services in C# and configured Docker environments and AWS services (EC2 and S3).

Dec 2021 – Feb 2023

Software Engineer, Globant / Belcorp · Arequipa, Peru

- Developed features that improved project allocation by 15%.
- Implemented more than 100 A/B experiments in VWO, achieving a 30% increase in conversions.
- Collaborated with the data analytics team to identify and implement web performance improvements.

Dec 2020 – Dec 2021	**Software Engineer, Auna · Lima, Peru** • Contributed to migration to React and Next.js, improving site loading speed by 15%. • Implemented data analytics tools at Farmauna, contributing to a 5% increase in daily revenue. • Developed backend services with FastAPI and managed deployments with Docker and AWS EC2/S3.
May 2022 – Sep 2022	**Software Engineer, Inka Labs · Arequipa, Peru** • Collaborated on a financial asset management application with React Native and Angular, improving user experience by 25%. • Implemented real-time notifications and REST APIs with FastAPI and SQLite.
Oct 2019 – Mar 2020	**Software Engineer, Inka Labs · Arequipa, Peru** • Collaborated on a financial asset management application with React Native and Angular, improving user experience by 25%. • Implemented real-time notifications and REST APIs with FastAPI and SQLite.

EDUCATION

2025 – 2028	**Software Design and Development, Tecsup**
2019 – Present	**Full-Stack Web Development, Tecsup**

SKILLS

Frontend expertise	React.js • React Native • Next.js • TypeScript • Tailwind CSS • Storybook • HTML5 • CSS3 • Angular
Backend expertise	C# (.NET Core / .NET 9) • Java • Spring Boot • GeneXus • APIs REST • Microservices • Node.js
Cloud and DevOps	AWS (EC2, S3, Lambda, CloudFront) • Docker • Vercel
Databases and platforms	SQL Server • IBM AS/400 • PostgreSQL • SQLite • Redis • SQL queries
Tools and methodologies	Git • GitHub Copilot • MCP (Model Context Protocol) • Golang • Agile/Scrum • A/B testing (VWO)

CERTIFICATIONS

Jul 2023 – Present	**Meta React Native Specialization, Coursera**
May 2023 – Present	**Meta Front-End Development Specialization, Coursera**
Present	**Full-Stack Web Development, CodiGo**

FEATURED PROJECTS

Present	**Sports Betting API (.NET 9)** REST API with Entity Framework Core and PostgreSQL; deployed on AWS EC2 with Docker and Cloudflare.
Present	**Sports Betting BFF (FastAPI)** Data aggregation, caching, and security for frontend applications; deployed on AWS Lambda.

Present

CSV Ingestion and Validation (Java / Spring Boot)

Microservice with hexagonal architecture for large-scale file processing with PostgreSQL and Docker.
